

Product Discontinuance Notice

Part Number Discontinued:	DTA-2136: Dual QAM-A/B/C receiver for PCIe
Date of Issue:	March 22 nd , 2021
Effective Date:	September 30 st , 2021

DISCONTINUANCE DETAILS:

- Manufacturing of the DTA-2136 is becoming increasingly difficult because various components used on the DTA-2136 have reached end-of-life.
- DekTec will discontinue the sale of the DTA-2136 per September 30st, 2021.

REPLACEMENT / ALTERNATE PART:

DekTec cannot offer an exact replacement.
For certain applications, the DTA-2131 or the DTA-2139C can be an alternative.

- DTA-2131 – Single-channel cable/terrestrial receiver for PCIe.
Supported standards: ATSC 1.0/3.0, DAB+, DVB-C(2), DVB-T(2), ISDB-T, QAM-A/B/C.
The DTA-2131 is a 'Software Defined Receiver' (SDR), which enables advanced RF measurements, but results in a significant CPU load.
- DTA-2139C – Twelve-channel cable/terrestrial receiver for PCIe.
Supported standards: ATSC 1.0/3.0, DVB-C(2), DVB-T(2), ISDB-T, QAM-A/B/C.
This card, like the DTA-2136, uses hardware demodulation, resulting in a low CPU load.
A clear big difference with the DTA-2136 is that the DTA-2139C has 12 receivers, which offers the possibility to receive a complete network in real time.

For more information on these alternative PCIe cards, see the DekTec website.

LAST TIME BUY:

- Orders will be accepted until September 30st, 2021.
- Due to limited availability of end-of-life components, we may not be able to fulfill all last-time-buy orders. We will service orders on a first come, first served basis.
- Upon acceptance by DekTec, such orders will be firm and final and cannot be subject to any rescheduling, cancellation, or termination by the buyer unless accepted in writing by DekTec.
